

CARPET INLAYS

Inlaid Carpet is a process whereby colored carpet is "cut in" with a background color to create a custom design. Inlays range from simple geometric designs to landscapes to company logos or in event, tradeshow and corporate settings.

From a photo or sketch, our skilled craftsmen can create carpet logos and carpet inlays as seen in the examples below.

Our process combines the different carpet colors and designs into one seamless carpet roll. Not only do we create custom carpet inlays for trade shows and special events, but The Inside Track provides high-quality inlays for office installations and corporate lobbies.

Custom Inlay carpets offer a warm residential look in a commercial setting such as a lobby, office or exhibit booth.

Our Sculptured Inlays offer a three dimensional look to any design or logo. Call The Inside Track Inc. today for more information on these great products!
