

STEP IN. STAND OUT.

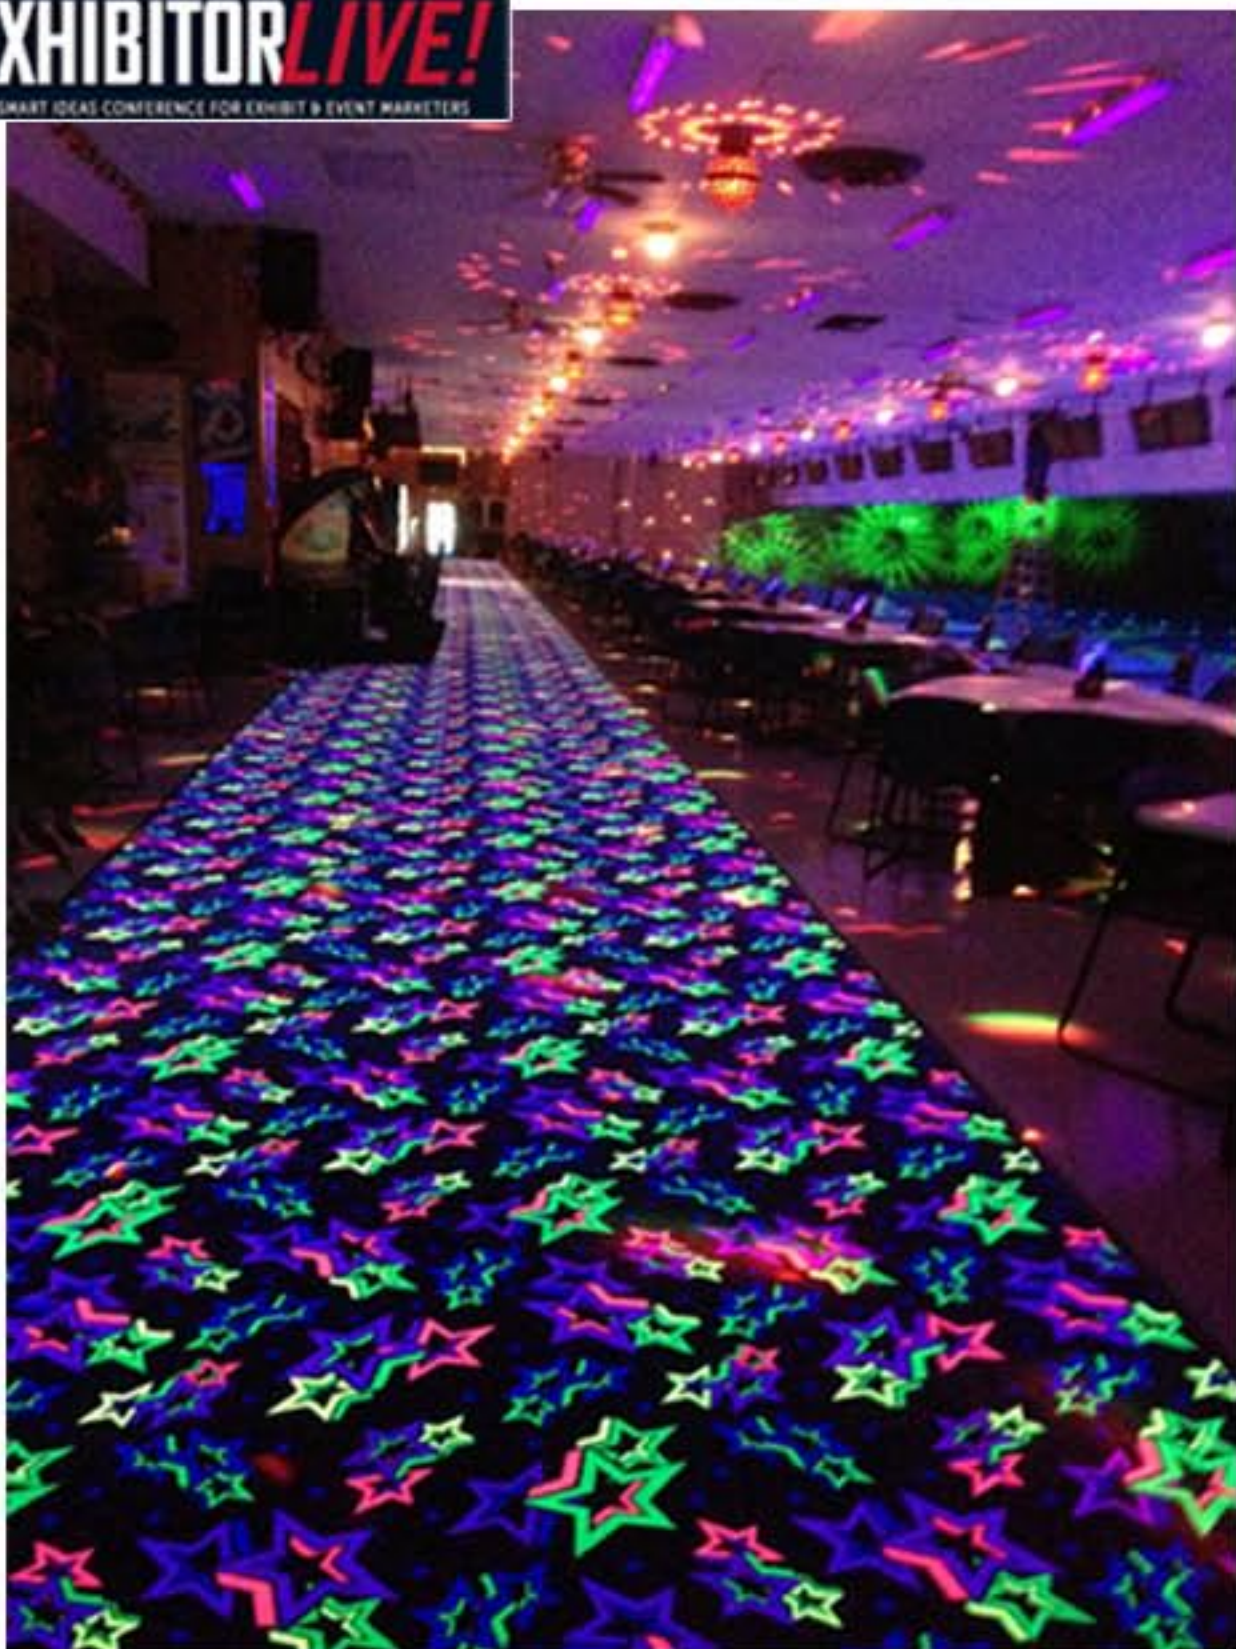

The Inside Track is proud to bring Dye Infused Carpet to the trade show, event, museum and retail industries!

Whenever you need a step and repeat pattern or unique design on carpet, but it needs to last for several years, then our dye infused carpet is the perfect solution.

This is the same process used to make the intricate carpet designs that you see in hotel lobbies, hallways and bowling alleys, so you can feel comfortable knowing that your carpet will withstand heavy foot traffic while keeping the design intact. The infusion process allows the ink to soak down to the base of the nylon fiber, which provides a much longer life and higher image quality than other top printed carpets. Available in 16, 32 and 42 ounce weights, we include scotch guard in the manufacturing process to help keep your carpet looking great for years to come. Whenever you have a need for printed carpet, The Inside Track is your one stop resource for great advice and quality products.

Our Dye Infused Carpet is featured in the new product show case at ExhibitorLive 2015
