

STEP IN. STAND OUT.

ENVIRO-DECK

The biggest drawbacks to using a raised floor is that they are heavy and expensive to ship, take a long time to install and dismantle and they can be very complicated to use.

The Inside Track has removed those obstacles by offering the industry an easy to install, light weight yet sturdy raised floor that is also 100% recyclable!

- Each panel is 2' x 2' x 2" high
- The interlocking panels offer easy installation and removal post show
- Each panel weighs just 5 1/2 lbs
- Available heights are 2" and 4", both with ADA compliant ramps

- A variety of flooring choices are available to cover your raised floor, including standard and recycled carpet, Rollable Bamboo and Vinyl
- On average 1,000 square feet of our raised flooring can be installed by 4 people in 1 hour
- Available for rental or purchase
