

## GAME SHOWS

Draw trade show attendees into your booth with an entertaining interactive game show experience just like you see on TV. The Inside Track can provide a wide range of engaging and amusing options that are perfect for team building activities, business meetings, parties or other events.

Attendees can step up and play a custom game of your design. We will

incorporate your product name or company's messaging into the questions and game format. With the same colors, sounds and lights as the games you see on TV, our customized game shows will impress even the most discerning audience.

Feature an interactive game show in your next trade show display to entertain and drive attendee traffic to your booth.

Popular game show formats involve attendees in learning about your company in a fun, memorable way and set you apart from your competitors!
